Regional Boundary File Specification

Data Files

This product consists of SHAPE format files for the representation of the regions of England (plus Scotland, Wales and Northern Ireland boundaries) in appropriate mapping and GIS systems.

These files contain the latest digital vector boundaries for Regions in England updated annually. Included are the region code and region name as follows:

RGN22CD	RGN22NM
E12000001	North East
E12000002	North West
E12000003	Yorkshire and The Humber
E12000004	East Midlands
E12000005	West Midlands
E12000006	East of England
E12000007	London
E12000008	South East
E12000009	South West

These boundaries have been generalised to a resolution of 20m and clipped to the Mean High Water mark coastline to provide the optimum balance of display speed and accuracy for most applications.

Data contains both Ordnance Survey and ONS Intellectual Property Rights.
